Set 25: Operating agreements and multiple owners

Outcome ENT.LEGAL.07: Identify what a written agreement among owners should cover

Module: Foundation 4: Names and legal structure

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
An operating agreement is a written document among an LLC's owners (members) that sets the rules for running the business. It usually covers: who owns what percentage; who makes which decisions; how profits and losses are shared; what happens if an owner wants to leave, becomes unable to work, or dies; how new owners can join; and how disagreements are settled. Even a one-owner LLC can benefit from one. Some states require it. Writing it while everyone gets along prevents painful arguments later.

Which topic belongs in an operating agreement?

A. What happens if an owner wants to leave
B. The menu for the office holiday party
C. The color scheme for the company website
D. Which social media app to post on first

Set 26: DBA (trade name) filings

Outcome ENT.LEGAL.08: Explain when a trade name (DBA) filing is used and what it does not do

Module: Foundation 4: Names and legal structure

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
A DBA ("doing business as"), also called a trade name, assumed name or fictitious name, lets a business operate under a name different from its legal name. A sole proprietor named Maria Lopez who sells as "Sunny Bakes" may need to register that name; so may an LLC operating under a different name. Where it is filed (state, county or city) depends on the location. A DBA does NOT create a new entity, does NOT give liability protection, and does NOT give trademark rights. Check local rules.

Maria Lopez sells cakes as "Sunny Bakes." What does a DBA filing let her do?

A. Operate under the name "Sunny Bakes"
B. Turn her business into an LLC without other filings
C. Stop all others from using "Sunny Bakes" nationwide
D. Protect her house from business debts

Where it is filed (state, county or city) depends on the location. A DBA does NOT create a new entity, does NOT give liability protection, and does NOT give trademark rights. Check local rules.

A business uses a DBA in two counties. What should the owner check?

A. Whether the logo needs a DBA
B. Whether each county requires its own filing
C. Whether one filing covers every country in the world
D. Whether DBAs are illegal

REFERENCE LABEL: NOT PART OF THE QUESTION ID S26-F2-Q2
Entrepreneurship, Set 26: DBA (trade name) filings · FORWARD 2: HANDLE THE COMPLICATIONS · Q2/5 · Outcome ENT.LEGAL.08 (local)

Learn
A DBA ("doing business as"), also called a trade name, assumed name or fictitious name, lets a business operate under a name different from its legal name. A sole proprietor named Maria Lopez who sells as "Sunny Bakes" may need to register that name; so may an LLC operating under a different name. Where it is filed (state, county or city) depends on the location. A DBA does NOT create a new entity, does NOT give liability protection, and does NOT give trademark rights. Check local rules.

A customer contract is signed only as "Fresh Bowls" with no legal name. What is the risk?

A. None at all
B. It cancels the DBA
C. Confusion about which legal entity is responsible
D. Signing as Fresh Bowls creates a new LLC called Fresh Bowls

REFERENCE LABEL: NOT PART OF THE QUESTION ID S26-F2-Q3

Limited liability has gaps. A PERSONAL GUARANTEE is a promise you sign to pay a business debt yourself if the business cannot. Lenders, landlords and some suppliers often ask new business owners for one, because the business has little history. If you sign it, your personal savings and other assets can be used to pay that debt, even if you have an LLC. Personal guarantees can be hidden in long forms. Read before signing, ask what you are guaranteeing, and consider whether the amount is one you could pay personally.

What is a personal guarantee?

A. A promise to pay a business debt yourself if the business cannot
B. A promise by the bank to lend you more money later
C. A guarantee that the business will make a profit this year
D. A warranty you give customers on a product

Many activities need permission from a government before you start. A BUSINESS LICENSE is general permission to operate in a city or county. A PERMIT covers a specific activity, such as selling food, putting up a sign, or doing construction. ZONING rules say what activities are allowed at a location, including homes; some neighborhoods limit customer visits, signs, parking or noise. Some jobs, such as hair care or electrical work, need a professional license. Rules depend on the activity and the place: city, county, state and sometimes federal. Rental leases and homeowner associations can add limits.

Lucy wants to sell homemade baked goods from her kitchen. What should she check?

A. Local and state rules for selling food made at home
B. Only whether her friends and neighbors like her cookies
C. Only how to post on social media
D. Only the price of flour at the store

A PERMIT covers a specific activity, such as selling food, putting up a sign, or doing construction. ZONING rules say what activities are allowed at a location, including homes; some neighborhoods limit customer visits, signs, parking or noise. Some jobs, such as hair care or electrical work, need a professional license. Rules depend on the activity and the place: city, county, state and sometimes federal. Rental leases and homeowner associations can add limits.

A food truck plans to sell in two cities. What should the owner check?

A. Nothing, trucks are always exempt

B. Each city's permits and rules

C. Only the truck's paint color

D. One city's rules, since all cities match

Set 29: When a professional helps

Outcome ENT.LEGAL.11: Decide when a question needs an attorney, accountant or other professional, and prepare for the meeting

Module: Foundation 4: Names and legal structure

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
Some questions are worth paying an expert to answer. An ATTORNEY helps with legal questions: contracts, entity choice, disputes, leases and trademarks. An ACCOUNTANT or tax professional helps with taxes, bookkeeping set-up, tax elections and estimated payments. An INSURANCE AGENT helps match coverage to risks. Get help when the stakes are high, the rules are complex, or a mistake would be hard to undo. Prepare: write your questions, bring documents, and ask about fees before you start.

Which professional best fits a question about a confusing lease clause?

A. A graphic designer who made the logo
B. A social media manager
C. An attorney
D. A delivery driver

Set 30: What an EIN is

Outcome ENT.ID.01: Explain what an Employer Identification Number (EIN) is for and when to check whether one is needed

Module: Foundation 5: EIN and business banking

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
An EIN (Employer Identification Number) is a nine-digit number the IRS (the federal tax agency) gives a business to identify it for federal taxes, much like a Social Security number identifies a person. Businesses that hire employees, most partnerships and corporations, and many LLCs need one. Banks often ask for it when opening a business account. Even a sole proprietor without employees may choose to get one so she can give clients the EIN instead of her Social Security number. The IRS says an EIN is free: you never have to pay a fee for one.

What is an EIN?

A. A registered trademark for a business name
B. A credit score assigned to new businesses
C. A state license that lets a business sell food
D. A federal tax ID number for a business

REFERENCE LABEL: NOT PART OF THE QUESTION ID S30-M-Q1

Entrepreneurship, Set 30: What an EIN is · BACKWARD 1 (concept simplification) · Q2/5 · Outcome ENT.ID.01 (local)

Learn
People have Social Security numbers so the government can match their tax records. A business can have its own ID number too: the EIN. When the business files taxes, pays employees, or opens a bank account, the EIN tells everyone which business it is. The number does not make the business legal or protect the owner; it is simply an ID, like a student ID number at school.

What does the EIN tell the IRS?

A. Where to buy supplies
B. How good the products are
C. Which business the records belong to
D. The owner's favorite color and hobbies

Learn
An EIN (Employer Identification Number) is a nine-digit number the IRS (the federal tax agency) gives a business to identify it for federal taxes, much like a Social Security number identifies a person. Businesses that hire employees, most partnerships and corporations, and many LLCs need one. Banks often ask for it when opening a business account. Even a sole proprietor without employees may choose to get one so she can give clients the EIN instead of her Social Security number. The IRS says an EIN is free: you never have to pay a fee for one.

Dee runs a one-person bookkeeping service as a sole proprietor. Clients ask for a tax ID on forms. She does not want to share her SSN widely. What fits?

A. Refuse all clients who ask for a tax ID
B. Get a free EIN and give clients that number
C. Make up a nine-digit number for the forms
D. Pay a website 200 dollars, believing it is required

The IRS lets businesses apply for an EIN directly, including online, at no charge. The online application asks for a "responsible party": an individual who controls the business, with a Social Security number (SSN) or ITIN. It is for businesses located in the US or its territories, and it must be completed in one session. If the business will be an LLC or corporation, the IRS advises forming it with the state first; applying before the entity exists may delay things. Be careful with look-alike websites that charge fees.

Where should an owner apply for an EIN to avoid unnecessary fees?

A. Through the city hall front desk
B. Through any website that appears first in an ad
C. Directly with the IRS
D. Through the business's bank teller

Set 33: A separate business bank account

Outcome ENT.BANK.01: Explain why business money belongs in a separate account

Module: Foundation 5: EIN and business banking

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
A separate business bank account keeps business money apart from personal money. All business income goes in and all business expenses come out of it. This makes bookkeeping and taxes easier, shows clearly what the business earns, and helps support the separation between an LLC or corporation and its owner. Mixing personal and business money in one account is called COMMINGLING. It makes records confusing and can weaken liability protection. The SBA lists opening a business bank account as a launch step.

What is commingling?

A. Keeping receipts in a folder by month
B. Paying taxes on time each quarter
C. Mixing personal and business money
D. Opening several savings accounts at once

This makes bookkeeping and taxes easier, shows clearly what the business earns, and helps support the separation between an LLC or corporation and its owner. Mixing personal and business money in one account is called COMMINGLING. It makes records confusing and can weaken liability protection. The SBA lists opening a business bank account as a launch step.

Which habit best prevents commingling?

A. Pay all costs in untracked cash
B. Use whichever card is closest
C. Use business cards and accounts only for business
D. Keep one shared card for both kinds of spending

Entrepreneurship, Set 33: A separate business bank account · FORWARD 2: HANDLE THE COMPLICATIONS · Q4/5 · Outcome ENT.BANK.01 (local)

Learn
A separate business bank account keeps business money apart from personal money. All business income goes in and all business expenses come out of it. This makes bookkeeping and taxes easier, shows clearly what the business earns, and helps support the separation between an LLC or corporation and its owner. Mixing personal and business money in one account is called COMMINGLING. It makes records confusing and can weaken liability protection. The SBA lists opening a business bank account as a launch step.

Which statement is accurate?

A. A separate account by itself makes the owner immune to every lawsuit and every business debt.

B. A separate account removes the need for bookkeeping.

C. A separate account helps, but it does not by itself guarantee liability protection.

D. A separate account eliminates taxes.

Set 34: Opening the account: documents, fees, signers

Outcome ENT.BANK.02: Identify documents a bank may ask for, account fees and who may sign

Module: Foundation 5: EIN and business banking

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
Banks set their own rules, but opening a business account usually requires: the business's formation papers (for an LLC or corporation), the EIN (or an SSN for some sole proprietors), a DBA certificate if using a trade name, and personal ID for each signer. A SIGNER is a person allowed to use the account. Compare accounts: monthly fees, minimum balance needed to avoid fees, transaction limits, cash deposit fees and online tools. Read the fee schedule before choosing; a "free" account may have conditions.

What is a signer on a bank account?

A. The bank employee who opened the account
B. A customer who pays the business by check
C. A person allowed to use the account
D. The state office that approved the LLC

Learn
A business DEBIT card takes money straight from the business account. A business CREDIT card borrows money that must be repaid; unpaid balances usually charge interest. A PAYMENT PROCESSOR is a company that lets the business accept card or app payments from customers; it charges a fee, often a percentage plus a small fixed amount per sale, and deposits the rest into the business account, usually a day or more later. Know which tool moves money in, and which moves money out.

An owner charges 2,000 dollars on a credit card and pays only the minimum each month. What is the main risk?

A. The purchase becomes free

B. No risk; minimum payments clear the debt quickly

C. The bank cancels the debt

D. Interest builds and the debt lasts a long time

Set 36: Moving money between owner and business

Outcome ENT.BANK.04: Record owner contributions and owner withdrawals separately from sales and expenses

Module: Foundation 5: EIN and business banking

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
Owners move money in and out of a business in a few ways. An OWNER CONTRIBUTION is money the owner puts in. An OWNER'S DRAW (also called a distribution) is an owner withdrawal for personal use; for sole proprietors and most LLCs, a draw is not a wage and is not a business expense, so it lowers the business's cash but does not reduce its profit. A LOAN from the owner to the business should be written down with how it will be repaid. In every case, move the money by transfer and record what it is, so the books show the truth.

Money an owner puts into the business is called what?

A. A refund to a customer
B. An owner's draw for personal use
C. A customer payment for a product
D. An owner contribution

Set 37: Reconciling transactions

Outcome ENT.BANK.05: Match business records against the bank statement and explain differences

Module: Foundation 5: EIN and business banking

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
RECONCILING means comparing your own records with the bank statement to make sure they match. Each month, check every deposit and withdrawal. Differences usually come from: transactions the bank has not processed yet (such as a check that has not cleared), bank fees you did not record, mistakes in your records, or charges you do not recognize. Unknown charges may be errors or fraud and should be reported to the bank quickly. Reconciling catches problems while they are still small.

What does reconciling mean?

A. Opening a second account at another bank
B. Comparing your records with the bank statement
C. Paying all bills on the same day
D. Asking the bank for a loan

REFERENCE LABEL: NOT PART OF THE QUESTION ID S37-M-Q1
Entrepreneurship, Set 37: Reconciling transactions · MAIN · Q1/5 · Outcome ENT.BANK.05 (local)

Entrepreneurship, Set 37: Reconciling transactions · BACKWARD 1 (concept simplification) · Q5/5 · Outcome ENT.BANK.05 (local)

Learn
RECONCILING means comparing your own records with the bank statement to make sure they match. Each month, check every deposit and withdrawal. Differences usually come from: transactions the bank has not processed yet (such as a check that has not cleared), bank fees you did not record, mistakes in your records, or charges you do not recognize. Unknown charges may be errors or fraud and should be reported to the bank quickly. Reconciling catches problems while they are still small.

Records show 2,450 dollars. The bank shows 2,435 dollars. The statement lists a 15-dollar monthly fee not in the records. What explains the difference?

A. Nothing; they match
B. A 150-dollar deposit error
C. A missing 2,435-dollar sale
D. The unrecorded 15-dollar fee

Set 38: Three kinds of business address

Outcome ENT.MAIL.01: Tell a mailing address, a physical business address and a registered-agent address apart

Module: Foundation 6: Addresses and contact details

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
A business can have different addresses for different jobs. The REGISTERED AGENT ADDRESS is where official legal papers are delivered; states usually require a physical street address in the state. The MAILING ADDRESS is where ordinary letters and bills go; it may be a PO Box in many cases. The PHYSICAL (or principal) ADDRESS is where the business actually operates. Some addresses appear in public state records, so a home-based owner may prefer not to use her home for every one. Each state sets its own rules; Washington, for example, does not allow a PO Box as the registered agent address.

Which address receives official legal papers?

A. The mailing address used for catalogs and bills
B. The address of the owner's favorite supplier
C. The address printed on the shipping boxes
D. The registered agent address

Learn
A PO BOX is a locked mailbox rented at a Post Office. Some carriers (like private package companies) need a street address. At participating Post Offices, the "Street Addressing" option lets a box holder use the Post Office's street address with the box number, so those carriers can deliver; availability varies and the customer signs an agreement. A PRIVATE MAILBOX is rented from a private store called a Commercial Mail Receiving Agency (CMRA). To receive mail there, the customer completes USPS Form 1583 with identity documents; requirements have changed over time, so check the current form.

Where is a PO Box rented?

A. At a Post Office
B. At the state business filing office
C. At any coffee shop that sells stamps
D. At a bank branch near the business

A PO BOX is a locked mailbox rented at a Post Office. Some carriers (like private package companies) need a street address. At participating Post Offices, the "Street Addressing" option lets a box holder use the Post Office's street address with the box number, so those carriers can deliver; availability varies and the customer signs an agreement. A PRIVATE MAILBOX is rented from a private store called a Commercial Mail Receiving Agency (CMRA). To receive mail there, the customer completes USPS Form 1583 with identity documents; requirements have changed over time, so check the current form.

Is Street Addressing offered at every Post Office?

A. No; availability varies
B. Only at locations in large cities
C. Only for customers with no business
D. Yes, at every single location

Think of renting a locker at a gym. A PO Box is like a locker at the post office: you get a key and your mail waits there. A private mailbox is like a locker at a private shop that holds mail for you, and you sign a form so the shop may accept your mail. Some delivery companies only drop off at a street address, so some post offices let you write their street address plus your locker number.

A PO Box is like a locker where?

A. At your house
B. At the post office
C. At the bank
D. At a private shop

Set 40: Which address each organization accepts

Outcome ENT.MAIL.03: Check which address a bank, state, platform or carrier will accept instead of assuming they are interchangeable

Module: Foundation 6: Addresses and contact details

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
Different organizations accept different addresses. The STATE often requires a physical in-state street address for the registered agent; Washington, for example, does not accept PO Boxes or private mailboxes there, though a PO Box may be listed as a separate mailing address. Some PACKAGE CARRIERS cannot deliver to a plain PO Box; Street Addressing at participating Post Offices can help. BANKS and some licensing offices may ask for a physical address. Before filing any form, read what kind of address it asks for.

In Washington, what can be listed separately as a mailing address?

A. A made-up address that sounds official
B. A PO Box
C. Nothing other than the agent's address
D. The address of another state's office

A. Yes, it is always illegal
B. Yes, the bank will close her account
C. Yes, businesses may only have one address
D. Not necessarily, if each fits the form's request

REFERENCE LABEL: NOT PART OF THE QUESTION ID S40-F2-Q4
Entrepreneurship, Set 40: Which address each organization accepts · FORWARD 2: HANDLE THE COMPLICATIONS · Q4/5 · Outcome ENT.MAIL.03 (local)

Learn
Different organizations accept different addresses. The STATE often requires a physical in-state street address for the registered agent; Washington, for example, does not accept PO Boxes or private mailboxes there, though a PO Box may be listed as a separate mailing address. Some PACKAGE CARRIERS cannot deliver to a plain PO Box; Street Addressing at participating Post Offices can help. BANKS and some licensing offices may ask for a physical address. Before filing any form, read what kind of address it asks for.

Which statement is accurate?

A. Only email addresses matter today.
B. Address rules depend on the organization and state, so read each form.
C. Every organization accepts a PO Box for every kind of address.
D. No organization accepts PO Boxes.

Set 41: Mailbox practicalities

Outcome ENT.MAIL.04: Plan pickup access, forwarding or scanning, renewals and important notices for a business mailbox

Module: Foundation 6: Addresses and contact details

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
Practical choices matter once you have a mailbox. PO Boxes come in sizes and are rented for set periods, such as 3, 6 or 12 months; fees vary by location and size. Plan how often you will check it: important letters, such as tax notices or bills, can have deadlines. Decide who may pick up mail, keep keys safe, and ask how large packages are handled. When moving, update your address with banks, customers and agencies; forwarding may help for a while but does not replace updating records. Renew before the rental period ends.

Why plan how often to check a business mailbox?

A. Boxes must be emptied every hour by law
B. Checking often lowers the rental fee
C. Important letters can have deadlines
D. Mail disappears after exactly one day

Customers judge a business by how easy it is to reach. A BUSINESS EMAIL that uses the company's own web domain (like hello@yourshop.example) looks more established than a free personal address. A separate business phone number (a second line or a calling app) keeps personal and business calls apart and protects privacy. Record a short voicemail greeting with the business name and when callers can expect a reply. Then answer within the time you promise; a clear, kept promise builds trust.

A customer emails on Saturday; the business replies Monday as its auto-reply promised. Was the promise kept?

A. No, weekends are banned for email
B. Only if the reply was very long
C. Yes, it matched what was promised
D. No, every email needs a reply in minutes

Set 43: One-time and recurring costs

Outcome ENT.COST.01: Classify costs as one-time or recurring

Module: Foundation 7: Costs, pricing and cash

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
Business costs come in two timing types. A ONE-TIME (startup) cost is paid once to get going: equipment, a first batch of supplies, a state filing fee, or a website design. A RECURRING cost repeats on a schedule: rent, software subscriptions, insurance, phone service, or a yearly license renewal. To compare them, convert recurring costs to the same period, such as per month or per year. In this course, all prices in questions are example assumptions, not real market prices.

Which is a one-time cost?

A. Renewing the business license every year
B. Buying a used oven to start a bakery
C. Paying for a website hosting plan each month
D. Paying the monthly rent for the bakery space

Total cost often follows one pattern: total = fixed + (cost per item x number of items). Do the multiplication first, then add. Example: fixed 200, cost per item 3, items 40: 3 x 40 = 120, then 200 + 120 = 320. A common mistake is adding first: (200 + 3) x 40 is wrong. Check that the total is never less than the fixed cost.

Fixed 50, cost per item 10, items 0. What is the total?

A. 0
B. 50
C. 500
D. 60

Entrepreneurship, Set 44: Fixed and variable costs · BACKWARD 1 (math prerequisite) · Q5/5 · Outcome ENT.COST.02 (local)

Learn
A FIXED cost stays about the same no matter how much you sell in a period: rent, insurance, a software plan. A VARIABLE cost goes up as you sell more: ingredients, packaging, shipping, or payment fees on each sale. Example: a candle maker pays 500 dollars of rent a month (fixed) and 4 dollars of wax and jar for each candle (variable). Making 100 candles costs 500 + 4 x 100 = 900 dollars. Knowing which is which helps you plan prices and see what happens when sales change.

A soap maker pays 300 dollars a month for a studio and 2 dollars of supplies per bar. What is the cost for 200 bars?

A. 302 dollars
B. 500 dollars
C. 700 dollars
D. 400 dollars

Set 45: A realistic startup budget

Outcome ENT.COST.03: Build a small startup budget with a buffer and no missing items

Module: Foundation 7: Costs, pricing and cash

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
A STARTUP BUDGET lists what you expect to spend before and during the first months. List one-time costs (equipment, filing fees, first inventory) and recurring costs for several months, because sales often start slowly. Add a CONTINGENCY: an extra amount, often a percentage, for surprises such as a repair or a price increase. Write down your ASSUMPTIONS (for example, "rent stays 400 dollars a month") so you can check them later. Compare the total with the money available.

What is a contingency in a budget?

A. Money owed to customers for refunds
B. Extra money set aside for surprises
C. A tax paid to the state each month
D. The owner's profit for the first year

REFERENCE LABEL: NOT PART OF THE QUESTION ID S45-M-Q1

Learn
COST PER ITEM (unit cost) is what it costs you to make or buy one item. If a batch of 40 cookies uses 20 dollars of ingredients and 4 dollars of bags, the cost per cookie is (20 + 4) / 40 = 0.60 dollars. PRICE is what the customer pays. The difference, price minus cost per item, is what each sale contributes toward fixed costs and profit. A price below the cost per item loses money on every sale. Include everything the item uses, such as packaging and labels, not just the main material.

A batch of 50 bracelets uses 75 dollars of beads and string. What is the cost per bracelet?

A. 3.75 dollars
B. 75.00 dollars
C. 1.50 dollars
D. 0.67 dollars

Set 47: Revenue, profit and cash

Outcome ENT.CASH.01: Tell revenue, profit and cash available apart in a small example

Module: Foundation 7: Costs, pricing and cash

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
Three words get mixed up. REVENUE (sales) is all the money earned from customers before costs. PROFIT is revenue minus all expenses for the same period. CASH is the money actually in the bank right now. They can differ: a business can have revenue but no profit if costs are high; it can show a profit but little cash if customers have not paid yet or if money went into inventory. Watching all three tells the real story.

What is revenue?

A. Money earned from customers before costs
B. Money borrowed from a bank loan
C. Money left after paying every expense
D. Money sitting in the bank right now

Three words get mixed up. REVENUE (sales) is all the money earned from customers before costs. PROFIT is revenue minus all expenses for the same period. CASH is the money actually in the bank right now. They can differ: a business can have revenue but no profit if costs are high; it can show a profit but little cash if customers have not paid yet or if money went into inventory. Watching all three tells the real story.

An owner says "We sold 10,000 dollars, so we have 10,000 dollars." What is wrong?

A. Revenue is a cost
B. Sales should be doubled
C. Sales are not cash or profit
D. Nothing; revenue always equals cash

Outcome ENT.PRICE.02: Compute markup and margin and explain why they differ

Module: Foundation 7: Costs, pricing and cash

Course scope: general education for US learners, not legal, tax or financial advice. Rules, fees and platform policies change and vary by state and city; each lesson says what to check and where. All businesses and people in the questions are fictional unless a lesson names a real company.

Learn
MARKUP and MARGIN both describe the gap between cost and price, but they use different bases. MARKUP is the gap as a percent of COST: (price - cost) / cost. MARGIN is the gap as a percent of PRICE: (price - cost) / price. Example: cost 6 dollars, price 10 dollars. The gap is 4. Markup = 4 / 6, about 67 percent. Margin = 4 / 10 = 40 percent. For an item with a positive cost sold above cost, the markup percentage is greater than the margin percentage. Mixing them up can lead to prices that are too low.

Cost 5 dollars, price 8 dollars. What is the markup?

A. 3 percent
B. 60 percent
C. 37.5 percent
D. 160 percent
