Drawing + written answer

CORRECT ANSWER

Drawing: Any closed shape with 4 straight sides that does not have 4 equal sides and does not have 4 square corners (for example a trapezoid with exactly one pair of parallel sides, or a kite)

Written: It is a closed shape with 4 straight sides and 4 angles.

GRADING NOTE Grade both: a quadrilateral that is not a rhombus, rectangle, or square, and the reason. A rhombus, rectangle, or square is not correct.
