60°; 1°

GRADING NOTE Explanation: a full circle is 360° , and the angle turns through $\frac{1}{6}$ of the circle, so it measures $\frac{1}{6}$ of 360° , which is 60° . An arc of $\frac{1}{360}$ of the circle gives a one-degree angle (1°). All three parts are required.

Drawing + written answer

CORRECT ANSWER

Drawing: Any triangle with one 90° angle, in any position or orientation, with the right angle marked (for example, two sides along grid lines that meet at a square corner)

Written: 1

GRADING NOTE Grade both: a right triangle with its right angle correctly marked, and the answer 1. The sides that form the right angle do not have to follow the grid lines; a rotated right triangle is correct.
